

## New Generation Vascular Doppler – LifeDop L150

### FEATURES:

- @ Interchangeable Doppler Probes
- @ Continuous Wave Unidirectional Doppler
- @ 2, 3, 4, 5, 8 MHz Frequency Probe Selection
- @ 8 MHz Frequency Probe – Standard option
- @ Foetal and Vascular monitoring using the same main unit
- @ Battery operated
- @ Re-chargeable Battery with Charger – Standard option
- @ Silky Soft Pencil type probe

### Vascular Applications:

Assists in detecting and locating arterial and venous vessels, determining patency and aiding in catheter insertion. Excellent tool for obtaining accurate low systolic blood pressures and performing **Ankle / Brachial Index (A.B.I)** studies. Excellent tool for assessing Impotence.
